

Week7a In Class Assignment - Gitlab Oauth

Due Mar 15 by 11:59pm **Points** 10 **Submitting** a text entry box
Available until Mar 15 at 11:59pm

This assignment was locked Mar 15 at 11:59pm.

Gitlab has an api. Read the documentation and get a basic web 1.0 application working that will list the users projects from gitlab.csi.miamioh.edu.

Documentation: <https://docs.gitlab.com/ee/api/> ↗ [\(https://docs.gitlab.com/ee/api/\)](https://docs.gitlab.com/ee/api/)

An example application is at <https://campbest.451.csi.miamioh.edu/cse451-campbest-web-public/gitlab/index.php> ↗ [\(https://campbest.451.csi.miamioh.edu/cse451-campbest-web-public/gitlab/index.php\)](https://campbest.451.csi.miamioh.edu/cse451-campbest-web-public/gitlab/index.php)

A couple of notes: It is not easy to find the actual url of the API. The documentation uses a nomenclature of GET /users for example. This is incomplete. The entire path to the api is <https://gitlab.csi.miamioh.edu/api/v4/> ↗ [\(https://gitlab.csi.miamioh.edu/api/v4/\)](https://gitlab.csi.miamioh.edu/api/v4/) and then the users would be appended to the end of this.

Submit your code to your gitlab and paste a link to your application here.

WARNING - DO THIS ON GITLAB.CSI.MIAMIOH.EDU, not GITLAB.com
