

# Todoist and OAUTH Assignment

[Re-submit Assignment](#)

---

**Due** Monday by 11:59pm      **Points** 20      **Submitting** a text entry box  
**Available** until Mar 11 at 11:59pm

---

Create a web application accessible via the url `.../cse451-UID-web/todoist1/index.php` that uses the users todoist account and allows your web application to work with JUST a project called `cse451Project1`. If this project does not exist your code should create the project.

Your application should list all tasks in this project using an unordered list.

It should have a form that will submit back to `index.php` and `index.php` should add the given task to the `cse451Project1` project.

See my working system at <https://campbest.451.csi.miamioh.edu/todoist/index.php> ↗  
(<https://campbest.451.csi.miamioh.edu/todoist/index.php>)

**Some Rubric (11)**

Criteria	Ratings			Pts
Base code runs	5.0 pts Full Marks	0.0 pts No Marks		5.0 pts
Code displays tasks for each project	5.0 pts Full Marks	0.0 pts No Marks		5.0 pts
Adds Task	5.0 pts Full Marks	0.0 pts No Marks		5.0 pts
Code	5.0 pts Full Marks	2.0 pts Minor errors	0.0 pts No Marks	5.0 pts
Total Points: 20.0
