Week4 - Rest Server Assignment

Due Feb 22 by 11:59pm   **Points** 20   **Submitting** a text entry box
Available until Feb 22 at 11:59pm

This assignment was locked Feb 22 at 11:59pm.

For your first rest server, please create a caching rest-server for the darksky API.

Also create an API entry that handles the DELETE method that will delete the cache entry for a given city. Add a delete cache entry to your web page.

Call this Temperature2

Submit links here to

- git
- an example HTML page that uses your caching server
- The API itself
- A curl statement that retrieves an entry
- A curl statement that invokes the delete cache method

Some Rubric (19)

Criteria	Ratings				Pts
rest server quality	**10.0 pts** **Full Marks**	**8.0 pts** **Average readibiity, some error handling but not complete.**	**5.0 pts** **Hard to follow, not well decomosed, error handling weak**	**0.0 pts** **No Marks**	10.0 pts
HTML page and Javascritp Quality	**5.0 pts** **Full Marks**	**3.0 pts** **Page has some issues but mostly works**		**0.0 pts** **No Marks**	5.0 pts
curl statements	**2.0 pts** **Full Marks**		**0.0 pts** **No Marks**		2.0 pts
delete method quality	**3.0 pts** **Full Marks**	**2.0 pts** **some errors in how it works or error handling**		**0.0 pts** **No Marks**	3.0 pts
				Total Points: 20.0
